

Curtis W. Meredith, O.D.

**ADDITIONAL PATIENT TESTING OPTION..... \$20**

**THIS TEST IS NOT REQUIRED FOR AN EYE HEALTH EXAM, BUT IS RECOMMENDED BY DR. MEREDITH AS IT GIVES ADVANCED INFORMATION FOR FORMING DIAGNOSES EARLIER. THIS CAN MINIMIZE THE EFFECTS TO YOUR VISION ON ANY DISEASES FOUND.**

## **DIGITAL RETINAL CAMERA SCREENING**

The Synamed Digital Retinal camera is used before your routine eye exam, **taking a picture of the inside of your eye using a computer-assisted camera.** These photos can be looked at years later to evaluate for subtle changes, for monitoring progress of diabetes, glaucoma, macular degeneration, or other retinal diseases just to name a few. This screening takes approximately 5 minutes.

**As with other new advanced equipment, your insurance plan may not cover the cost of this screening.**

- YES**, I want to take advantage of the SDR camera and will pay the \$20 fee today.
- NO**, I decline this additional test against doctor's recommendation.
